

eTORK
C2250

Specifications:

- Drive: 3/8".
- Range: in.-lb.: 50-250 in.-lb.
- Range: 6-28 N.m
- Accuracy: $\pm 3\%$ (clockwise)
- Accuracy: $\pm 6\%$ (counter-clockwise direction)
- Dimensions: 12.3" x 1.5" x 1.5"

Features:

- Wrench clicks and/or releases when preset torque value is reached
- Meets the requirements of America National Standard ASME B107.300-2010
- Accurate to $\pm 3\%$ in clockwise direction compared to most competitors $\pm 4\%$
- Operates and measures torque in both clockwise and counterclockwise direction
- 45 Tooth Ratchet Head for easier clockwise and counter-clockwise operation in tight spaces
- Hardened Alloy Steel Housing for strength and durability, resulting in a slimmer, lighter design
- Tempered Chrome-Alloy Springs assure long-term accurate performance
- Each wrench is tested and certified at the factory prior to shipment. Individual certification is included with each wrench.
- Ergonomic, large diameter soft grip handle is more comfortable to use, and requires up to 50% less turning force than most competitive products when adjusting the torque.
- Dual, English and Metric scales are easier to read than on most competitive wrenches, reducing possible setting errors.
- Locking knob secures selected torque setting from accidental changes. Torque setting is done by pulling large locking knob out and turning the handle.
- Protective plastic carrying case is included.
- Factory Repair and Calibration Center is located in Roswell GA for any needed service and assistance.
