

eOUTIL DL1903 Digital Level

Product Description

Overview:

Whether you're a beginning woodworker or a master carpenter, useful 3-in-1 device-This newest digital gadget features with protractor, angle finder and level in one measuring tool. Large and ultra clear display helps you to work at dark condition.. It gives you the ability to precisely find angles, accurately measure levels, and easily read measurements. This digital protractor has a strong magnetic base that can be firmly attached to table saws, circular saws, miter saws, and more. You can easily read precise measurements with its bright display. The LCD display can be read in any lighting situation without squinting, straining, or hurting your eyes. While it's often used to measure angles on saw blades or ensure your project is level, this tool can also be used in welding or fabrication, bending iron or conduit, and setting angles for knife and blade sharpening. DIY projects, professional woodworking, and home-improvement Renovations have never been easier. Specifications -- accuracy +/- 0. 1 degrees at 0 and 90 degrees; +/- 0. 2 degrees at the rest; LCD display resolution 0. 1 degrees. Units -- displays angle readings in degrees, in/ft. , mm/m, percent slope. Widely used in wood & machinery industry, machinery, medical fields and etc

DIGITAL LEVEL

Flips in upside down position that is functional in all positions

- Heavy Duty Extruded Anodized Aluminum Frame
- Absolute and Relative measurement conversion
- Beep function for your operation precision
- Portable size, easy to transport and provide highly accurate readouts
- V-Groove on the measurement base, for easy attach to round pipes
- Powerful built-in magnet on the base secures the attachment to iron surface

Specifications:

- Dynamic measuring tool: Angle Finder, Protractor and Level
- With LCD Display, easy to read
- 4 Unit of measurement (°degrees/ %/ mm /m /IN /FT)
- Measuring Range: 4 x 90°(0 ~ 360°)
- Working Temperature: 0°C to 40°C
- Storage Temperature: -10°C to 50°C
- Resolution of Digital Display: 0.05°
- Precision of Digital Display: ±0.1° at 0° and 90°, ±0.2° at other angles
