

BLACK GUARD™ CLASS ZZ SETS & PINS

Black Guard™ black oxide treatment typically penetrates .000040" - .000060" deep, which will visually reveal wear patterns allowing the inspector to calibrate or replace gage pins more effectively.

Black Guard™ treatment will help prevent rust and corrosion, which will extend the useful life of the gage.

- **Prevents Rust and Corrosion**
- **Visible Wear Indication**
- **Longer Life**
- Class ZZ (.0002" or 0.005mm tolerance)
- Go (Plus) or NoGo (Minus)
