The CL8300 represents a major advance in calibration standards because of its high precision, compact design and ease of use. The CL8300 series is a dc voltage and current source that supplies voltages from 100 nV to 110 Vdc and currents from 1 nA dc to 110 mA dc with 0.002% (20 ppm) accuracy. The CL8300 has been ergonomically designed for the user with such features as simple, fast readout of values and functions on the 11-digit backlit display, 200 predetermined calibration values in memory, and automatic calibration.

This lightweight, portable calibrator can give laboratory precision in the field or in the workshop. The unit is
