Details

- Class Z tolerance of + 0.00254mm
- Hardness of 60 - 62 Rockwell C
- Material E52100 bearing quality steel
- Geometry of pin is within .00013mm
- Surface finish 8 Micro-Inch or better

Product Description

Product Description

Company, a world leader in the manufacture of fixed limit gages offers these affordable class z pin gage sets in Plus (+ 0.0054mm/- 0.00000mm) and come packaged with box and insert clearly marked. Used to measure hole sizes, calculate distances between holes, gage slot widths and can also be used for Go or No-Go gaging. (Note diameters above 0.850" tolerance increases, see gage makers tolerance chart) Uses – for precision GO/NOGO measuring of hole sizes and depths, checking hole location and distance, and setting micrometres. All gages are uniformly " long with ground ends, allowing you to use both ends for increased gage life. Gages are Carbon Chrome Alloy Steel (grade E50 bearing quality steel) and heat treated to 60-6 Rockwell C hardness. All of our products come with a Certificate of Class Conformance, traceable to NIST (National Institute for Standards Technology). The size and "+" (GO) or "-" (NOGO) are laser etched with a Meyer Exclusive Serial Number Feature to ensure traceability on the shop floor on all gages that are 0.06" and larger. Founded in 960 Company is an ISO 900:008 approved manufacturer, and all products pass through our ISO/IEC 705:005 approved laboratory for final inspection
