Up for auction is a Ametek Hunter Spring L-30M Mechanical Force Gauge in excellent condition. This is a direct reading gauge, reading in pounds from 0-30. The bezel rotates for zero adjustment. Accuracy is + or - 0.5% of full scale. There are two sensing heads, one measures compression, the other tension. The construction is cast aluminum with a black wrinkle finish. The gauge features a "hold at max" button which retains the max force applied to the gauge until the reset button is pushed. The case has been etched with a # and "tool room". The wooden box has been marked VP30 and Tool Room. I will include a reprint of the operating instructions and the data sheet with the gauge. This gauge appears to work as intended and is being sold to be "in working order". Buyer has 3 days upon receipt to accept or notify of intent to return. If not satisfied selling price will be refunded less shipping costs. Thanks for viewing my auction. Please read the standard terms below. STANDARD TERMS - PLEASE READ 1. UNLESS OTHERWISE STATED ALL ITEMS ARE SOLD AS DESCRIBED AND NOT SUBJECT TO RETURN UNLESS MISREPRESENTED. 2. PLEASE E-MAIL ANY QUESTIONS BEFORE BIDDING. 3. MULTIPLE PURCHASES MAY BE COMBINED TO SAVE ON SHIPPING COSTS. 4. ITEMS PAID FOR WITH A PERSONAL CHECK WILL BE HELD FOR 7 DAYS TO ALLOW FOR THE CHECK TO CLEAR. 5. BUYER MUST CONTACT ME WITHIN [READ MORE](#)
