

[1/2" Dr Electronic Torque Wrench](#)

1/2 Inch Drive Digital Electronic Torque Wrench 15-150 ft-lbs 18

[larger image](#)

Patented Technology

- Double Gear Sensing System
- Designed, engineered, and tested by Brown Line Metal Works, the patented* D.G.S.S. technology ensures repeatable accuracy of +/- 3.5% both clockwise & counter-clockwise
- *Patent No.: US 7,367,250. Additional patents pending
- Accurate from 20 - 100% of full scale (7% accuracy from 10 - 20% of full scale)

Microprocessor Controlled

- 8-bit electronics ensures accurate readings and simplicity of use
- Allows for both Peak and Track mode
- Individually calibrates each wrench
- Supplies unique serial number for each wrench

Ratchet Head

- 1/2" drive reversible ratchet
- 32-tooth gear provides an 11.25° arc while handling high torque loads
- Forged from Chromium Vanadium alloy to ensure strength
- Conforms to ASME B107.10 2005 standards

Range

- 15 - 150 ft-lbs/li>
- 180 - 1,8000 in-lbs
- 20.3 - 203 Nm

Digital Control

- Large backlit digital display shows both target torque and current read-out Intuitive button design makes operating torque wrench simple LEDs and digital display provide visual feedback when operating wrench
- Buzzer creates audible feedback when target torque is reached
- Easily switch between ft-lbs in-lbs, and Nm
- Automatically powers off when not in use for 2 minutes
- Low battery indicator

Handle

- Soft-touch overmold provides comfortable non-slip grip
- Engineered plastics ensure an impact resistant housing
- Comes with plastic molded carrying case.
