

Precisebuilt 2752

1/4" Drive 20-200 in-lb (35-219 kg-cm) Dual-Direction Click Torque Wrench

About this item

- Precise, Dual-Direction Operation - Tested for +/-2% in-factory calibration and accurate up to +/-4% clockwise and +/-6% counterclockwise. Meets ASME B107.300 standards and comes with a calibration certificate.
- Avoid Over-Torquing - The clearly engraved dual-range scale, heavy-duty cam and pawl mechanism, and an audible click that you can also feel eliminates guesswork and tendency of over-tightening fasteners.
- Built Tough - The all-steel construction lends superb durability to this certified torque wrench. The shaft is constructed from nickel chrome-plated alloy steel and fitted with a robust spring steel.
- Easy To Use & Carry - The detailed knurling creates a grippy handle allowing for better grip and control. A durable blow-molded case for storage and lets you conveniently bring this hand tool anywhere repairs are needed.
- For Professionals & DIYers - Designed for accurately tightening bolts, nuts, and other fasteners. This certified torque wrench is ideal for mechanic work and auto and bike maintenance and repairs.
