Description

This Diamond Series torque wrench by Capri Tools features a diamond contour grip design that combines an ergonomic sure-grip and a lightweight impact resistant construction. The diamond contour grip is designed for a comfortable and steady hold. The handle is made of premium impact resistant materials which is 30% lighter than traditional torque wrench handles. Our spring loaded pull down ring and specially engineered ultra smooth torque dialing help you switch torque settings on the fly: simply pull down the ring, turn the handle, and release the ring. The positive lock mechanism secures the torque setting in place while you work. The quick release button helps you easily switch between bits and sockets. The engraved Inch-Pound and Newton Meter dual scale provides a vivid and clear reading of the measurement. Adjustment is available anywhere between 55-250 in-lbs. or 7.1-27.4 Newton Meters, with torque tolerance at +/- 4%. A Certificate of Conformance with individualized traceable serial number is included in accordance with ASME B107.300-2010 and ISO 6789-1:2017 standards. Each torque wrench comes with a high-impact case for storage.
