

GENUINE MITUTOYO 500-196-30 DIGITAL CALIPER

The calibrated Mitutoyo 500-196-30 Absolute Digimatic caliper is for measuring inner/outer diameters, depth, and step of items in harsh workshop conditions. This caliper has a measurement range of 0 to 6" (0 to 150mm), resolution of 0.0005" (0.01mm), and an accuracy of $\pm 0.001"$. The LCD screen displays in inches and metric units. This unit has a roller and Absolute electrostatic capacitance type linear encoder for accurate measurements. Functions offered by this model include absolute measurement, incremental measurement, scale contamination alert (provided by the Advanced Onsite Sensor (AOS), and low-voltage alert. MSI Viking calibrated tools include a Certificate of Calibration that provides evidence that the tool has been calibrated and is within allowable error specifications. MSI Viking calibration labs are located in Duncan, SC, and are A2LA Accredited to ISO/IEC-17025 standards (International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) 17025 International Standard for testing and calibration laboratories). MSI Viking is also certified by American Global Standard to ISO 9001 quality standards in Dimensional, Electronics, Pressure, Force, Load, Mass, Torque, Temperature, Humidity, and more precision instruments and systems. This caliper has a battery life of approximately 3.5 years of normal use. This unit arrives new in its original manufacturer packaging and comes with an SR-44 battery and a fitted, plastic case.
