The VC-1E Glastonbury Southern Gage Vernier Caliper Master - English is on sale at Gaging.com!

Features:

- Used to calibrate and set micrometers
- 1.00 - 6.00" diameter in 1.00" increments for outside jaws, 1/2 to 4 1/2 inside jaws
- **Case hardened, stabilized, ground and lapped to ± 0.0002**
- The master is superior to gage block calibration because they do require block stacks so it is much faster to inspect the linear range of the tool
- They indicate wear on the caliper anvils because both the ID and OD jaws are inspected without additional setup
- Larger sizes are available upon request
