Material Type: 5000g,0.01g

Brand	Ciziyiheng
Color	blue
Recommended Uses For Product	Food, Jewelry, Coins, Packages, Envelopes, Pins, Screws, Herbs
Special Feature	Unit Convert
Display Type	LCD

About this item

- 【Special Note】 Our products are calibrated at the factory. Since calibration is a complicated task, please do not calibrate by yourself unless necessary. If you accidentally enter the calibration program, please use the two 500g standard weights and calibration instructions included in the package.
- 【High Accuracy】 This precision scale is equipped with an upgraded high sensitivity built-in sensor, 0.01g accuracy, fast response. Error indication; and external calibration. Linearity error of ±0.03g.
- 【Easy to use】 The "CAL" button on the front panel makes self-calibration very easy." PCS" function helps you to calculate parts such as pins, screws, coins, etc.; "UNIT" function allows you to change units directly; "Tare/Zero" function is used for stripping.
- 【Full function】 Support 10 weighing units such as g/kg/ct/oz/lb/dwt/%/tol/mm, and support weighing counting function, unit conversion function, calibration function, zero point stripping function, memory function, overload alarm function.
- 【LCD digital display】 Large LCD display with large digits, clean display, easy to read, clear and precise results in seconds.
- 【Advanced and Unique】 This analytical electronic balance has an advanced and unique power-on self-test function, highly integrated IC circuit board, fast and accurate readings, and high accuracy for continuous weighing.
- 【Quality Assurance】 This laboratory scale is made from laboratory quality materials and has a stainless steel weighing pan; and a durable ABS body.Each measuring scale is calibrated, tested and inspected before being shipped to the customer.
- 【Versatile】 This balance is suitable for different scenarios such as factories, laboratories, schools, and businesses. It can meet the requirements of laboratory, kitchen, food, scientific and jewellery measurements. Quick and portable measurement of the quality and quantity of objects.
