QX Series Cordless Torque Multiplier

The innovative QX Series Cordless Torque Multiplier will reduce your bolting time and cost, while ensuring repeatable accuracy for all torque-critical joints. Designed with a premium Norbar™ gearbox and an efficient, time-tested closed-loop transducer, the Torque Multiplier is world-class in quality, control and programmable configurations to maximize your productivity.

Features

- **Closed-loop transducer** delivers a torque accuracy of +/- 5%
- **Integrated gearbox** provides premium quality and accuracy
- **Brushless Motor** offers maximum durability
- **Multi-function display module** with cycle status alert and audible alarm offers instant feedback and easy setup
- **360° adjustable handle**, with 6 mm threaded port for eye hooks or other tethering points, provides operator comfort, flexibility and safety options
- **Standard or custom reaction arms** available
- **Optional wireless communication** for process control with I/O and data collections (USB connection standard)
- **Ingersoll Rand's ICS software** provides operators the ability to access and program basic fastening strategies, as well as more advanced options to adapt to the most complicated bolting applications
- **Class 1 Division 2 Haz Tool** option available

Model Specifications

Model	Item	Torque (ft-lb)	Torque (Nm)	RPM	Weight (lb)	Weight (kg)	Length (in)	L (in)
