

BAND-IT®

E1000 TIE-DEX DIGITAL CALIBRATION KIT

Calibration of your Tie-Dex Tools is critical to the performance and consistent tensioning of the bands by the tool. Based on your specific application the calibration tool makes it easy to adjust both the hand tools and pneumatic tools to the correct tension.

- Calibration Gauge has a range of 0 to 500 lbs with an accuracy of +/- 1 lb
- Mounting hardware included for bench mount use or hand held use without fixturing for ease of use
- Internal Li-Ion battery with 65-hour runtime
- USB cable included for charging
- Digital storage accessed through USB
- Data tracking software included
- Additional data logging features available through <https://www.transducertechniques.com/ssi.aspx>
