- Optional Setting Rings for zero point adjustments
- TiN-coated measuring contact points(over 6mm/.275" range models) provide excellent durability and impact resistance and allow the instrument to measure right to the bottom of a blind hole
- Highly durable because of carbide-tipped contact points (anvils)
- Measurement can be taken closer to the bottom of the blind bore
- Can measure deep holes using an Extension rod (optional) which is available on models over 6mm (.275") measuring range
- With Ratchet Stop for constant force
- Setting Rings for zero point adjustment are optional
- Supplied in fitted plastic case up to 100mm / 4". Over 100mm / 4" supplied in wooden case
- Made in Japan

Includes:

- Mechanical Micrometer Holtest
- Plastic Case

This product is professionally and meticulously designed to provide superior durability you are looking for. micrometer. Mitutoyo's philosophy at that time was to make the best mechanical micrometer in the world. But also to produce them in quantities that made them affordable and available to all of manufacturing so they could improve the quality of the products they manufactured. This philosophy was expanded in the next several decades to include a wider product offering focused on mechanical, dimensional gaging products. Mitutoyo focused its R&D and production efforts on creating the most advanced micrometers, calipers, indicators and other measurement tools in the world.
