

PRE-SET SLIP TYPE

The Seekonk Pre-Set Slip Type tools extends fool proof torque limiting action into a convenient compact design. A precision clutch mechanism suspended between heavy duty thrust and lateral bearings provides accurate and consistent operation. As with other Seekonk slip type torque tools, over torquing is impossible, even with continued turning. Accuracy +/- 3%

The MCL series provides one directional slip action with lockup in the opposite direction.

MODEL #	DRIVE	TORQUE RANGE
MC-10P	PIN/Vise	5 in.oz - 3 in.lbs.
MC-10H	1/4" hex female	5 in.oz - 3 in.lbs.
MC-200M	1/4" sq. male dr.	3 - 35 in.lbs.
MC-200F	1/4" hex female	3-35 in lbs.
MCL-200M	1/4" sq. male dr.	3 - 35 in.lbs.
MCL-200F	1/4" hex female	3-35 in lbs.
