CUSTOMER REVIEWS

CLASS Z ENGLISH GAGE SETS

We started making the original ZZ back in 1965 and our competition has tried, but can't copy the quality of these affordable pin gage sets. We now have taken the extra step for the better pin gage, Class Z. Introducing the MEYER Z. A closer tolerance (.0001), more accurate and better for your needs. We have done it again. We've made a better pin gage that no other has attempted with the same great features listed below.

See for yourself, below is a comparison of the Class ZZ and the Class Z gage pin specifications.

OLD Class ZZ	NEW Class Z
Size deviation .0002"	Size deviation .0001"
Roundness geometry .0001"	Roundness geometry .00005"
Surface finish 10 micro	Surface finish 8 micro

The Meyer Gage Class Z gage pin will meet or exceed the requirements of Class ZZ, and can replace the Class ZZ in any situation or application.

FEATURES:

More features than gages costing twice the price.
