

Leitech Digi Gauge

The Leitech Digi Gauge is a refined model of the Leitech High-Resolution Gauge. The Digi Gauge reveals the exact measurement on a digital screen. By using the Leitech Digi Gauge you can improve the accuracy of your measurement.

The resolution of the scale on Leitech Digi Gauge System is 0.01 mm/0.0005".

When the requirement for the accuracy is not at this scale, we recommend [Leitech Combi gauge](#), which has a measuring accuracy of 0.5 mm/0.025".

Alternatively, we recommend the [Leitech High-Resolution Gauge](#), which has a measuring accuracy of 0.1 mm/0.005".

Maintenance

Replacement of inserts and calibration of depth.
A new gauge in approx. 2 min.!
