Many metalworking products do contain metals that are included in the latest Prop 65 warning. Exposure to the elements can be harmful. May cause cancer and reproductive harm.

DETAILS

MACHINE SHOP SOLUTIONS

Problem: Setting and checking gages for accuracy can be difficult without the right set of tools.
Solution: High-accuracy precision gage tools offer the versatility to handle multiple sizes in one convenient set. For nearly 80 years the Webber Gage Division has concentrated on the design, development and production of micro-accurate gage blocks and accessories. Webber Gage is an acknowledged leader in the manufacturing of gage blocks and offers the widest selection of gage blocks. We offer gage blocks in steel and croblox® (chromium-carbide) materials, Inch and Metric measuring systems, and in both rectangular and square-style blocks.

✓ Accurate to within millionths of an inch to provide improved quality of production
